Professional Summary

B.Tech Information Technology student with hands-on experience in Java, Spring Boot, React, and full-stack application development. Experienced in building and deploying real-world applications, including a freelance client project, with a strong foundation in Data Structures and Algorithms demonstrated through 230+ LeetCode problems.

Education

Mary Mediatrix High School — Telangana
SSC – CGPA: 10.0 — *2020 – 2021*

NRI Junior College — Telangana
Intermediate (MPC) – 93.9% — *2021 – 2023*

St. Martin's Engineering College — Hyderabad, Telangana
B.Tech in Information Technology – CGPA: 7.8 — *2023 – 2027*

Experience

ULS Technologies — 2024
Java & IT Industry Application Intern
- Gained practical experience with Java programming and software development workflows through an industry-focused internship.
- Applied Java programming concepts and developed an understanding of application development practices.

Freelance Web Developer
Client Project – Telangana Reels
- Developed and deployed a client website for booking content creators and reel shooters for events and occasions.
- Built a responsive web interface using Next.js, TypeScript, and Tailwind CSS and deployed it on Vercel.

Projects

CareerOS – Learning, Assessment & Career Growth Platform | *React, TypeScript, Java, Spring Boot, PostgreSQL* — Live
- Developed a full-stack platform integrating learning, assessments, and career-growth workflows into a single application.
- Built frontend features using React and TypeScript and backend services using Java and Spring Boot with PostgreSQL.
- Developed RESTful APIs to connect frontend workflows with backend services and application data.

Hexapod Walking Robot – IoT | *IoT Sensors*
- Developed an obstacle-avoiding hexapod robot that detects objects in its path and changes direction accordingly.
- Presented the project at the **Rashtrapati Bhavan Youth Skill Expo 2025**.

Student Check-In System | *React, Supabase, JavaScript*
- Developed a student attendance and check-in management system with authentication and real-time data storage using Supabase.
- Designed responsive dashboards for managing student records and attendance information.

Weather Forecasting Application | *JavaScript, REST APIs*
- Integrated weather APIs to provide real-time forecasts and location-based weather information with dynamic UI updates.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, C
Frontend: React, Next.js, HTML, CSS, Tailwind CSS
Backend: Spring Boot, REST APIs
Database: MySQL, PostgreSQL, Supabase
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS

Certifications

- JPMorgan Chase Software Engineering Job Simulation – Forage (2025)
- Java & IT Industry Application Internship – ULS Technologies (2024)

Achievements

- Solved **230+ problems on LeetCode**, strengthening algorithmic problem-solving across data structures and algorithms.
- Participated in the **Quantanova V1 National-Level 24-Hour Hackathon**.
- Presented research paper "Labour Market Prediction Using Machine Learning" at the **ICASH 2024 International Conference**.
